

Creasing Machine KSL 435

Easy to use machine with working width 435 mm. Creasing of paper (also digitally printed) made by KSL 435 provides simple but very precise bend. Users can choose between four types of crease. The creasing machine can also be used to process paper with a special surface treatment, such as that laminated on both sides. The creasing machine allows the easy folding of wedding cards, invitations, menus, annual reports, promotional materials, etc.

- Metal construction
